

Subject: Modular approval request

FCC ID: 2AATFFMB400EL

Date: October 21, 2013

Dear reviewer:

The modular would like to have authorization as modular approval.

The requirements of section 15.212 have been met and shown on the following statements

- 1) The radio elements of the modular transmitter must have their own shielding
The modular has shielding. Please refer to external photo.
- 2) The modular transmitter must have buffered modulation/data inputs
The buffer is integrated with IC TC35661SBG
- 3) The modular transmitter must have its own power supply regulation
The Part No. of regulator is TC35661SBG
- 4) The modular transmitter must comply with the antenna and transmission system requirements of §§15.203, 15.204(b) and 15.204(c).
Antenna is integrated with the module. No antenna connector and external amplifier is used.
- 5) The modular transmitter must be tested in a stand-alone configuration
The modular is tested in a stand-alone configuration via an extender. Please refer to test setup photo.
- 6) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.
The modular complies with the requirement. Please refer to label location and label sample exhibit.
- 7) The modular transmitter must comply with any specific rules or operating requirements
The modular complies with the requirement. Detail information please refer to user manual
- 8) The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.
Max average field strength is 98.212 dBuV/m
The device complies with RF exposure requirement.

Please contact me if you have any questions about this letter.
